## ADAMS SPRINGS

### *The largest institution of its kind in California*

**A**DAMS SPRINGS, the largest institution of its kind in California, is nestled in the heart of one of Lake County's most beautiful pine forest regions, 3300 feet above the sea, 93 miles north of San Francisco. Beauty that is rugged and picturesque, climate that is unsurpassed for health and pleasure, a mineral water that has no known equal anywhere for the treatment and cure of stomach, liver and kidney trouble, and provisional facilities for having the best of a good time have been contributing factors in the long-standing popularity and success of this resort. ADAMS SPRINGS has been owned and operated by Dr. W. R. Prather for thirty-seven years.

In its field of usefulness ADAMS SPRINGS MINERAL WATER has no rivals. The water is extremely beneficial in the treatment and cure of stomach, liver and kidney troubles and diseases whose source is traceable to them. Flowing from the spring very cold the water is highly carbonated, and unlike the majority of mineral waters is very pleasant to drink, being preferable to plain water.

Accommodations to suit any individual taste are obtainable. Rooms with bath, in various locations, tent-cottages, some with running water, hot and cold, some with shower and toilet, some close to the main hotel, and others farther away in the midst of the pines,

rooms in various cottage buildings, and individual bungalows with shower, toilet and running water, roomy and comfortable, modern and convenient. A spacious dining room, modern and beautiful, seating 600, adjoining the main hotel, adds to the enjoyment of dining. Dining service and food prepared by a competent and experienced chef and assistants is on a par with the best of the metropolitan hotels.

ADAMS SPRINGS serves and caters to the young and old and to the health and pleasure seeker. To the health seeker it offers its mineral water. To those who are in quest of pleasure it offers dancing nightly on a perfect dance floor, with music supplied by a talented jazz orchestra; miles and miles of winding trails that thread their way thru the pine forests to high cliffs and mountain tops; swimming in a large open-air concrete tank; fishing and hunting in season; golf; and among the incidentals shuffle board and croquet. An up-to-date soda fountain and confectionery store is located on the resort grounds.

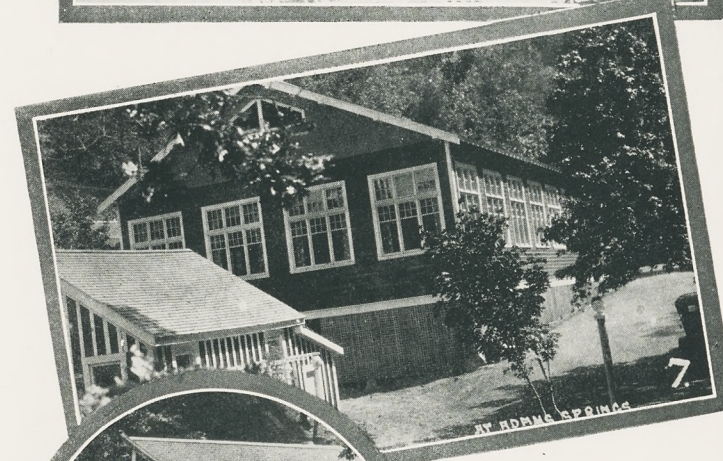

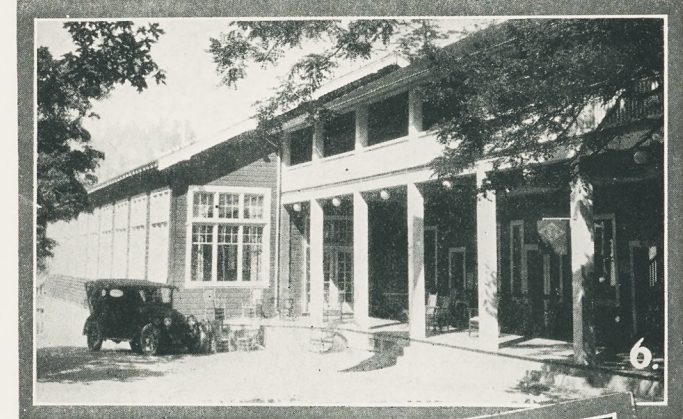

#### ANALYSIS OF WATER OF ADAMS SPRINGS

By  
PROFESSORS THOS. PRICE AND JOHN HEWSTON, JR.

	GRAINS PER GALLON
Carbonate of Lime	28.714
Carbonate of Magnesia	99.022
